

## Please take note of the corrections to Page 5 in the Product manual below:

Equipment Settings Heat Pump **—**₽ ON Indicator 1 O or B Reversing 2 N Valve 4 ω To configure the receiver 8 4 for Heat Pump operation, 16 Ch III slide the HP switch to the 32 ۰ **II** ON position as shown. EH ~ The Reversing Valve polarity can also be set. OFF = O HP ∞ □∎< O/B ∘ ∎\_∢ and ON = B. Electric Heat ON Indicator 1 2 N To configure the receiver 4 ω for Electric Heat operation, 8 ₽ slide the EH switch to the 16 Ch ON position as shown. 32 ۰ III EH ΗP ∞ **I** O/B ~ III Gas Furnace ON Indicator 1 2 N To configure the receiver 4 ω for Gas Heat operation, 8 slide all of the equipment 16 Ch switches to the OFF position 32 ۰ as shown. EH ~ HP ·• O/B

For Electric HHeat only the EH switch should be on and the rest of the switches off. For Gas furnace all DIP switches should be off except of course need to turn on the DIP switches that determine the house code.
